PROJECTS

Google Notes Clone

React Project | Sept 2022

- The Google Notes clone project aims to create a replica of the popular note-taking app Google Notes.
- The project involves developing a web or mobile application that allows users to create, edit, and organize their notes digitally.
- The application will provide a user-friendly interface with a clean design, allowing users to easily navigate through their notes and perform various actions.

Ecommerce Website

MERN Stack | Nov-Dec 2022

- An e-commerce website built on the MERN stack is a platform that allows users to buy and sell products online.
- The MERN stack, consisting of MongoDB, Express.js, React.js, and Node.js, provides a robust and scalable foundation for building web applications.
- The website typically includes features such as user authentication, product catalog, shopping cart functionality, payment integration, and order management.
